Don’t Forget!

1. If students received a smartphone, give students the instructions for turning the phone into a hotspot for their particular device. Instructions are located at http://digital.dadeschools.net/sprint.asp.

2. Unlike mobile devices, it is not necessary for phones to be turned on at the school. Once you activate the student’s phone, the student should take the phone home and turn it on. The device may need to be charged. The student should follow the prompts on the device to finish the activation process.
